HELPFUL HINTS

To Change length of fingers . . .

The instructions for the gloves in this book have been written to allow for a change in the length of fingers of gloves if necessary.
Any change must be made before shaping at top of each finger or thumb. Work more or less rows even before shaping finger tips. Slip glove to hand to determine length required before shaping.

Approximate finger tip shaping.

Men's Gloves—¼ to ½ inch Women's Gloves—¼ inch Children's Gloves—¼ inch

Check your Gauge:

It is very important to obtain the correct gauge given in instructions. To check your gauge, measure off about 2 inches on your knitting or crocheting and mark with pins. Count the stitches between pins. If you have less stitches than required for 2 inches, your work is too loose, try a smaller size needle. If you have more stitches than required for 2 inches, your work is too tight, try a larger size needle. Always cast on loosely for ribbing or when working with Nylon or Angora.

Blocking or Steaming . . .

To steam or block gloves or mittens, lay flat on pressing board. Steam with moderately hot iron over a wet cloth taking care not to let weight of iron rest upon any one spot. Steam on one side, turn and steam on other side. Do not steam ribbing or Angora. Allow to dry thoroughly before removing from board.

Weaving Stockinette Stitch:

Thread a tapestry needle and bring pieces to be joined close together.
